

TITLE: Libraries

State Board of Education Ref: 18-5-20, 2320, 2510

A library is located in each of the county schools. Two full-time librarians are employed. One is full-time at the secondary school and one travels to the five elementary schools. The librarian is responsible for maintaining the library. The elementary librarian works with all teachers in teaching them library practices to help in maintaining the library.

Library skills are taught by the classroom teacher and documented in their lesson plans. The librarian and aides co-operate with the classroom teacher in this effort and reinforce the library skills during library visits.

Library aides are provided for several elementary schools to assist the librarian in operating the school library.
