

TITLE: Health
State Board of Education Ref: 2413, 2550.011

The county employs a health nurse for 6/10 time. The nurse spends time at each school to screen students. If any deficiencies are found, correspondence is sent to parents. In cases where families are needy and cannot remedy deficiencies the health nurse works with other agencies to solve the problems.

SCHOOL HEALTH SERVICES POLICY

Health services are provided by two systems: the local County Health Department and the school nurse. The County Health Department Nurse does provide some services to the public school system with the County Board of Education contributing funds to the Health Department.

Compulsory immunization for school children is scheduled through the County Health Department. Other services provided by the County Health Department concern the control of communicable diseases.
